

# V8043 5000 Series Zone Valve

*The ultimate in Zone Valve technology and reliability*

When it comes to top quality, Honeywell's new 5000 Series Zone Valves truly are "in the zone". Among the many unique features is a patented ball seal design that provides a new sealing surface each time the valve closes, dramatically extending life expectancy of the valve (and dramatically reducing maintenance time).

Add in the easy installation, "Slow-Close Technology" motor and "Quick Fit" pushbutton actuator, and the bottom line is that the 5000 Series Zone Valves are a contractor's dream.

# V8043 5000 Series Zone Valve

*The ultimate in Zone Valve technology and reliability.*

**Built-In Quality** by retaining all the great performance and reliability of the original V8043 with improved features.

**Updated Styling** for a sleeker, more modern look.

**Innovative Motor Technology** for silent motor and system operation to reduce customer complaints or callbacks.

**Built On Honeywell Tradition** for compatibility with a full range of thermostats.

**“Quick Fit” Pushbutton Actuator** removal feature offers robust metal-to-metal connection, unlike the weak plastic used by other brands.

**Easily Serviceable And Upgradeable** because there's no need to remove the valve from the pipe to change or replace the inside parts.

**Patented Ball Seal Design** provides a new sealing surface each time the valve operates, producing a quality seal and significantly increasing service life.

- Tests show 5000 Series valves last twice as long as traditional competitive zone valves
- Wide range of popular models and valve body styles available
- In the event of a service call, the valve seal and ball plug are easily accessed for “in-situ” service (no cutting or refitting required)
- Style selection is easy for contractors familiar with the V8043 1000 Series. Just replace the “1” with a “5” when ordering. For example, if you'd use a V8043E1012, just order a V8043E5012 to get the premium 5000 Series
